# 1 About this Version

Several new settings especially for system messages will increase usability of this version of Trader Client.

Bug fixes should increase the quality of provided game data.

# 2 Installation

## 2.1 Installation

See the installation instructions in the document *RunningBall Trader Client – Quick Start Guide*.

## 2.2 Minimum System Requirements

- > System Processor: 2GHz or greater
- > System Memory: 1GB or greater
- > Free Disk Space: 200MB disk space
- > Operating System: Windows XP or later
- > JRE: 1.6.0\_16 (recommended for the best performance behaviour)
- > Networking: Internet access

# 3 Version Compatibility

- > N/A

## 4 New Features

- > Own configuration for **system message popups**
- > **Sound** settings for **soccer cancel events** available.
- > **Event filter** extended by **Possible Throw In**
- > **Start** and **cancel game** events displayed in **results view**
- > **Search** can be executed by hitting **enter key**
- > **Date** shown for **system messages** and **cricket events**.
- > When trying to **unbook** an **added game**, the **users preventing the request are shown**.

## 5 Dropped Features

- > N/A

## 6 Fixed Issues

- > Handling of games in different time zones and over multiple days corrected.
- > Code signing certificates updated.
- > Several events renamed to correct terms for cricket.

## 7 Known Issues and Limitations

### 7.1 Known Issues

- > When opening a huge number (75 and more) of detail windows for running tickers, the application may crash.
- > When logged in for a long period while constantly adding games, the memory usage will grow and the reaction of the graphical user interface may slow down. A restart or re-login is recommended in that case.

### 7.2 Limitations

- > N/A
