1 About this Version

This version contains a big soccer feature which is called “Expected Goals”. It contains live match information about the possibility scoring a goal and it’s displayed in several views. There were also some minor bugs corrected.

2 Installation

2.1 Installation

See the installation instructions in the document *RunningBall Trader Client – Quick Start Guide*.

2.2 Minimum System Requirements

- > System Processor: 2GHz or greater
- > System Memory: 1GB or greater
- > Free Disk Space: 200MB disk space
- > Operating System: Windows XP or later
- > JRE: 1.8.0_161 (recommended for the best performance behaviour)
- > Networking: Internet access

3 Version Compatibility

- > N/A

4 New Features

- > New “**Expected goal**” values are available for soccer **players** and **teams** in different views

5 Fixed Issues

- > Logging issue
- > Sound and dialog configuration settings

6 Known Issues and Limitations

6.1 Known Issues

- > When opening a huge number (75 and more) of detail windows for running tickers, the application may crash.
- > When logged in for a long period while constantly adding games, the memory usage will grow and the reaction of the graphical user interface may slow down. A restart or re-login is recommended in that case.

6.2 Limitations

- > N/A
