1 About this Version

This version contains an extension to current soccer injury break feature. Injury break feature in soccer is now team related as well. Also, for teams which have longer names, and in case they cannot be seen in full, they will start moving from left to right side and vice-versa. Feature “Rolling Team names” is also included in this release.

2 Installation

2.1 Installation

See the installation instructions in the document *RunningBall Trader Client – Quick Start Guide*.

2.2 Minimum System Requirements

- > System Processor: 2GHz or greater
- > System Memory: 1GB or greater
- > Free Disk Space: 200MB disk space
- > Operating System: Windows XP or later
- > JRE: 1.8.0_161 (recommended for the best performance behaviour)
- > Networking: Internet access

3 Version Compatibility

- > N/A

4 New Features

- > Team related Injury Break event
- > Rolling Team names

5 Fixed Issues

- > Core events are being displayed for finished games in case of changing sports.
- > Head 2 Head view works for Volleyball with.

6 Known Issues and Limitations

6.1 Known Issues

- > When opening a huge number (75 and more) of detail windows for running tickers, the application may crash.
- > When logged in for a long period while constantly adding games, the memory usage will grow and the reaction of the graphical user interface may slow down. A restart or re-login is recommended in that case.

6.2 Limitations

- > N/A
